...bringing seniors and services together

PERSONAL EMERGENCY RESPONSE SYSTEMS a/k/a (PERS UNITS)

Listed below is information on providers of personal emergency response systems available to individuals in the Broome County area.

Common features of PERS providers:

- Push button can be worn around the neck or on the wrist
- Access to a dispatcher 24 hours a day
- One-time installation or activation fee
- Monthly service charge on the unit that is installed or activated
- A list of emergency contacts (most providers prefer having a list of names to work from)
- In the event of an emergency, the dispatcher will try to contact one of the people listed as an emergency contact, if no one is available, then help is automatically sent to the home.

Typical Price Range-Installation/Activation Fee and Monthly Charge:

The three local PERS providers that are listed below will actually install their unit for you. The additional providers listed, will send you their unit and will charge you an *activation* fee once you have the unit set up and ready to use. This one time fee can range from \$30 to \$100. Monthly service rates typically range from \$30/month to \$80/month depending on the response provider you choose, and the type of unit. Most units are two-way voice activated, although a few providers still offer the non-voice unit which is the least expensive option. The more costly units are the ones that provide additional services such as medication reminders and dispensers; activity monitors; and periodic check-in calls.

Individuals who are eligible for the Medicaid program may be able to access a PERS unit through Medicaid. Contact CASA at 778-2420 for more information.
