

# The Yellow Dot Program

Yellow Dot is a free program designed to help first responders provide life-saving medical attention during that first “golden hour” after a crash or other emergency.

Yellow Dot kits contain a medical information card and a Yellow Dot Decal.

At the scene of an emergency in a home, look for the Yellow Dot on or near the front door and find vital medical information in the freezer. Transport card with the patient to the hospital.

## Participants:

- Complete the card in pencil
- Attach a recent photo
- Place it in car’s glove compartment
- Place decal on rear driver’s side window

## At home, participants:

- Place a Yellow Dot near the front door
- Place a completed card in the freezer compartment of the refrigerator

## Get yours at the following locations:

- Broome County Sheriff’s Office
- All Broome County Senior Centers
- Online at: [www.nysheriffs.org/yellowdot](http://www.nysheriffs.org/yellowdot)

# The Medication Drop Box

Unwanted, unused or expired prescription drugs have been determined to present substantial risks to our community by either falling into the wrong hands, or by damaging our environment through improper disposal. Many abusers, a high percent of whom are teens, are known to have obtained their controlled substances from the homes of family and friends.

**Any old or not needed medications can be dropped off at the front lobby of the Broome County Sheriff's Office Mon-Friday during normal hours.**

Medications in standard containers may be deposited in those containers. Loose medication can be put into plastic bags available at the collection box and then deposited. Please ensure any liquid medication is enclosed in secure containers before depositing. Once collected, the Sheriff's Office will ensure the medication is disposed of according to State and Federal laws.

These programs brought to you by

# Roadwise

*Your tool for understanding how medications may affect you and your driving.*

Did you know some over-the-counter medications can increase crash risk by up to 41 percent? Use AAA's free online tool, Roadwise Rx, to explore how your medications impact your safety behind the wheel.

Roadwise Rx is a tool designed to help you learn more about your medications and how they may affect your driving.

Once you have entered all your medications that you are currently taking, both prescribed and over-the counter, click "View Results" to find any "interactions, warnings and information" about your medications.

Medications have intended and unintended effects on your body, and these effects change based on the other medications that you're taking and the foods that you eat. Not only does that affect how you feel, many of these effects can also impact your ability to drive safely.
