Dental Services and Medicare

Medicare does not cover most dental care, dental procedures, or supplies, like cleanings, fillings, tooth extractions, dentures, dental plates, or other dental devices. Medicare Part A (Hospital Insurance) will pay for certain dental services that you get when you are in a hospital. Part A can pay for inpatient hospital care if you need to have emergency or complicated dental procedures, even though the dental care is not covered.

Dental Services & Medicare Advantage Plans & Medicaid

If you are enrolled in a private Medicare Advantage plan or you have Medicaid, you should check with your plan to see what it covers. Medicare Advantage plans and Medicaid sometimes pay for services that are not covered under Original Medicare. Some states offer stand-alone dental plans through the health insurance Marketplaces. People with Medicare are not eligible for subsidies to pay for these plans. Find your state Marketplace at HealthCare.gov or call the Marketplace call center (available 24/7) at 1-800-318-2596.
